

INTRODUCING

ATLAS

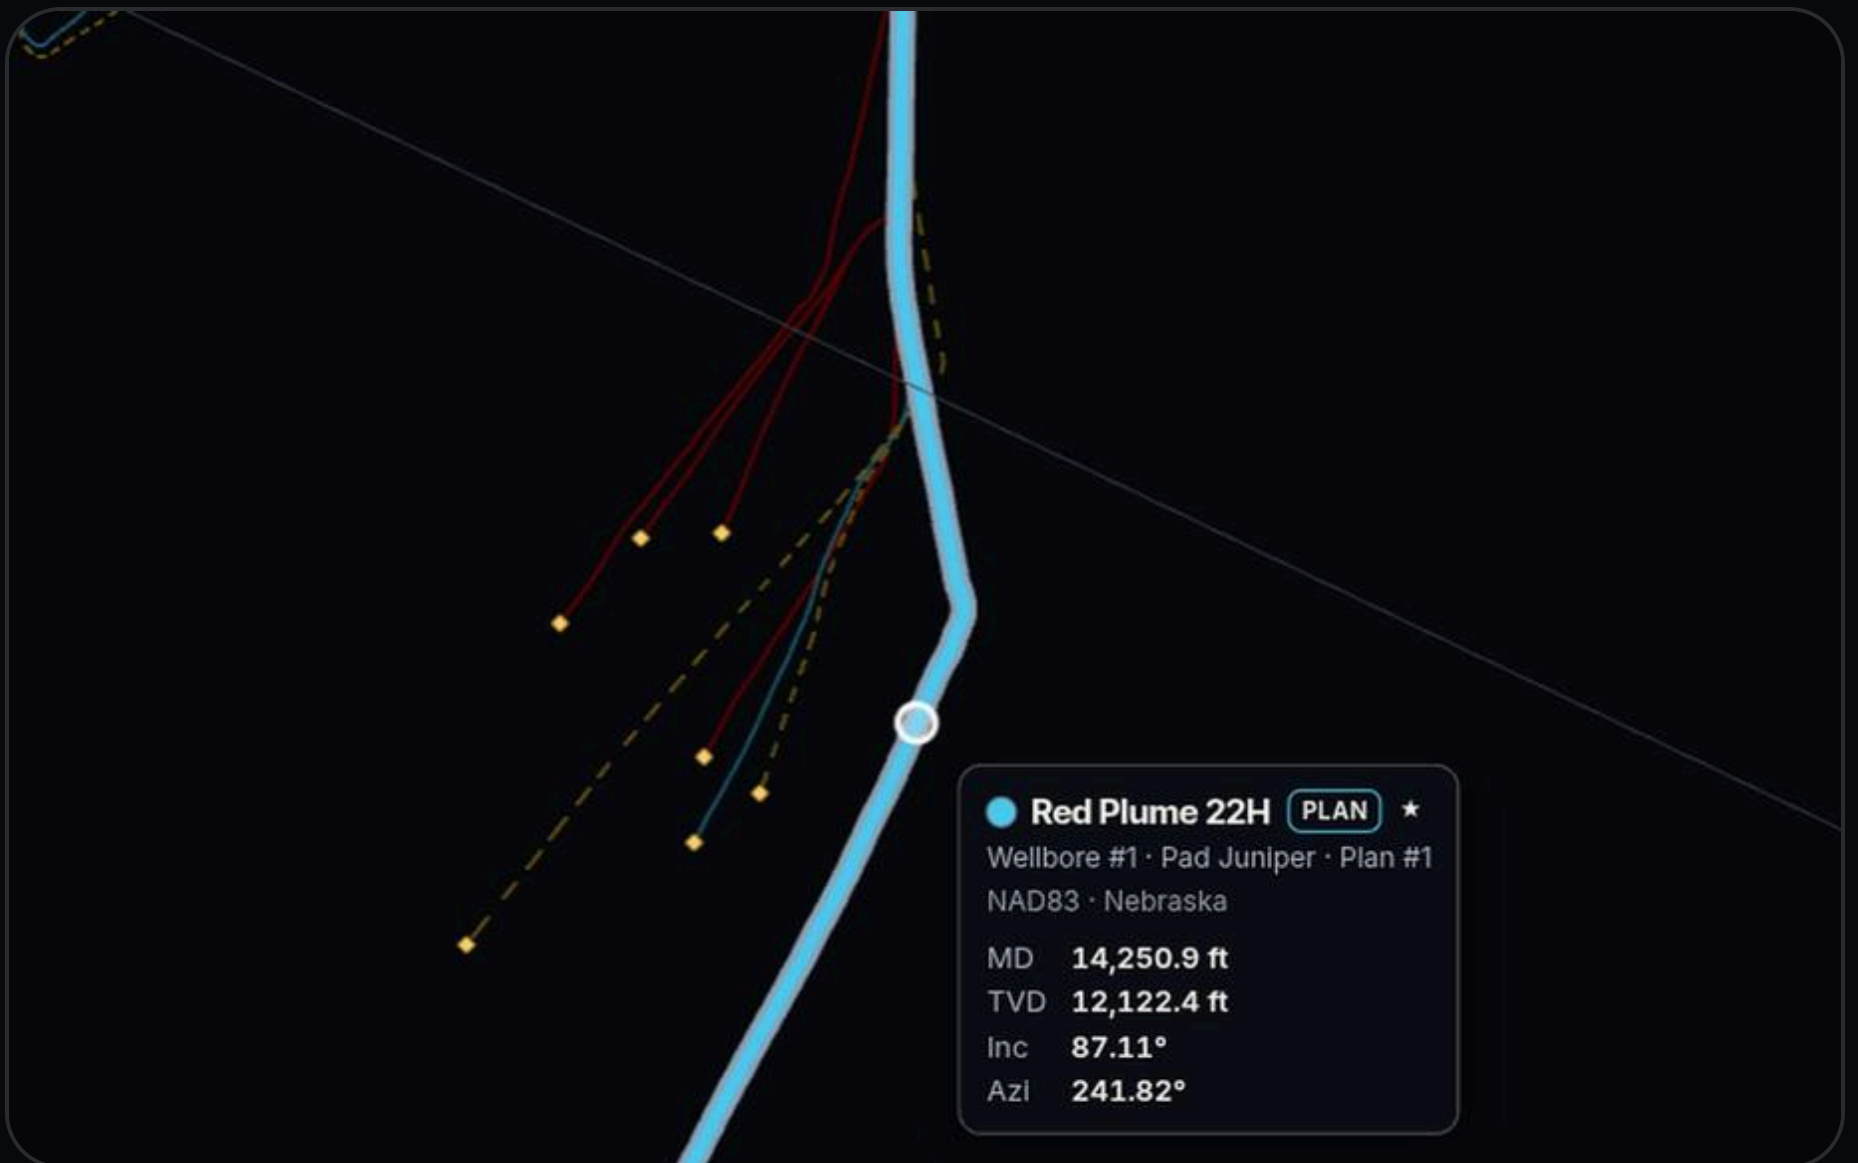

An extremely lightweight 3D well viewer for oil & gas projects.

- Runs in your web browser on a computer or a phone.
- Dive into the well data for planned and surveyed wells, all together in 3D.
- Loads in seconds. No install and no account.

ATLAS

Survey data for every well in the file.

- Hover over a well to highlight it and see its MD, TVD, inclination, and azimuth.
- Click a well for its full survey table. Copy it, or save it as CSV or Excel.
- Switch between 3D, Plan, and Section views. Turn targets on or off.

Services from Heseman Consulting

1 Well Planning

Directional well plans built around your program's goals.

2 Auditing

- Service Provider QMS, Tool Reliability, and Training
- SOPs
- Systems Efficiency and Internal Processes
- Field Tickets and Cost

3 Training

Courses for office and rigsite personnel.

- Wellbore Positioning
- Well Planning

Wellbore Positioning Course

Training for office and rigsite personnel on how a wellbore gets positioned and where input errors creep in. Offered as a 1-Day Course or a 3-Day Course.

1-DAY COURSE

Wellbore Positioning Fundamentals

- Common failure points and directional QC
- Datums, map zones, and depth references
- Geomagnetism and survey QC
- Error models and ellipses of uncertainty
- Well planning tools
- Anticollision

CORPORATE TRAINING

Wellbore Positioning Course

3-DAY COURSE ADDS

Practical Well Planning

Two days of hands-on work. The class plans wells together.

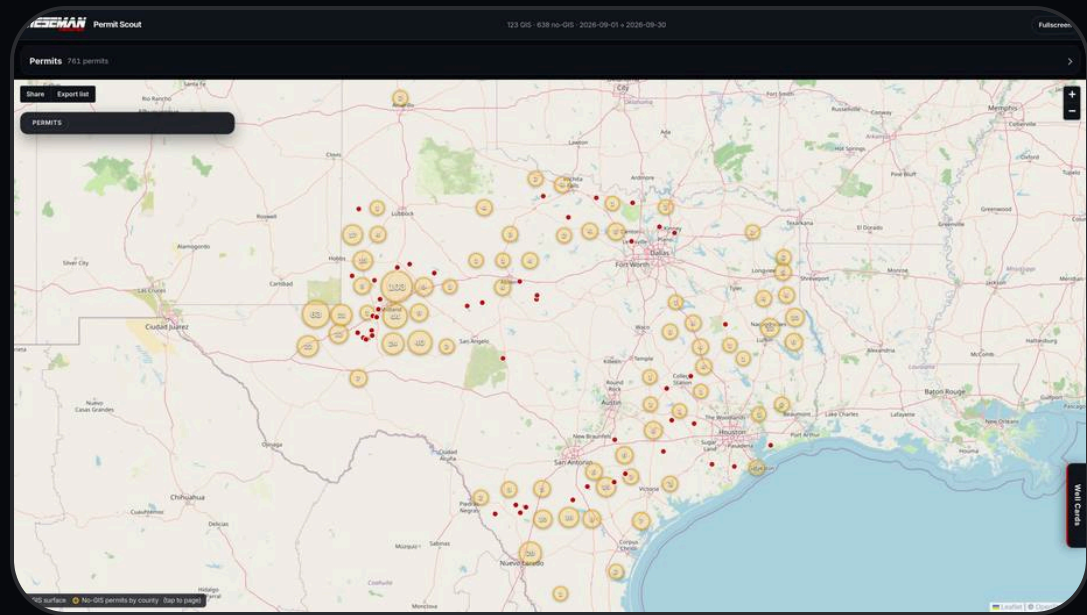

- Offset scouting and data entry
- Anticollision mitigation
- Plots, plan reports, and AC reports
